Okinawa  
# 3 April 1946

Dear Folks,

AS you can see I am writing on a differnt typewriter . OUR other typewriter is being repaired and this is the substitute. I think that this one is worse than the other one and I keep forgetting to captitalize.

FORGETTING CAPITALIZE

We had a pretty bad scare last night about this tidal wave/. THE alarm was spread and you know how rumors spread . I ~~am~~ was all set to run for the hills. Weve gone through so much out here that I wasnt much affraid of a tidal wave . A typhoon is supposed to hit here on thursday, which is the tommorrow, but I wouldnt be suprised if it missed us. I hope that it hits ~~here~~ here again and tears the place all up, but I hope that noone is injured or killed . There hasnt been any excitement here for quite awhile . I just hope that no more of those tidal waves occur while I am on my way home as they are something that I wouldnt like to me ss with.

This letter is pretty messed up as you can see . I cant type on it v ery well and it isnt such a good typewriter.

I WILL PUT IT AON ALL CAPS, AND TRY IT FOR AWHILE. I DONTSEE WHY THEY DONT PUT All typewriters like this as they would be easier TO TYPE ON AND THEY WOULD BE ALSO EASIER TO READ.

There have been some more talk of the Army taking over here but nothing is ~~definit~~ definite as yet . There have been some Army officers looking around here for the past few days . I hope they take over soon but I expect they wont take over before June . If they would take over before then we might go home 45 days ahead of time .

I havent had any mail from you as regular as I have been getting i it. Something seems to fouled up more than ever with the mail. I hope that they get it straintened out before long .

I cant think of how or what to write . I have just about 51 days to go here and I am really sweating them out . For some strange reason the month of March passed pretty quickly . I suppose it was because of the new job that I have .

Love

Frank

P.S. Dont worry if another typhoon hits here. We have our founat kits cabled down to the ground. They dont catch wind easily either.
